### Program Description

An Online Instructor Certificate program. Available to all faculty and teachers across the nation, this certificate program is a series of fully online courses that will show you how to design and deliver a quality course via the Internet. Not only will you master today's fast-growing learning methodology, you will put yourself on a career path with unlimited potential.

With courses tailored to college faculty and to high school teachers, this comprehensive program includes self-paced, instructor-facilitated, and instructor-led courses. You will learn about both the technology and the pedagogy of online learning, and experience it as your students would.

This is an intensive certificate program comprised of six courses in which you will learn to teach online. In fact, you will actually develop a course that you intend to teach. Topics include online teaching pedagogy, technology, copyright, graphics, Web development and much more.

### Admission Requirements

Teacher at any level, Elementary- College faculty

### Curriculum

- Develop and deliver a lesson, module or entire course online.
- Understand the pedagogy of online teaching and learning, and be able to accommodate multiple learning styles in online instruction.
- Know how to evaluate your course for continuous quality improvement.
- Understand copyright issues related to course development.
- Know how to create and use digital elements in the course.

Participants must take all of the Section I courses: Introduction to Online Teaching, Blackboard Basics, Intensive Course Development, Copyright Issues, and Course Quality Assessment.

Participants must choose at least one of the Section 2 courses: Intro to Graphic Design, Intro to Web Development, or Intro to Captivate.

Except for the first two in the series, courses may be taken concurrently, enabling you to complete the program in as little as 10 weeks.

### Program Fees

Tuition & Fees	\$925
Books	
Other fees	
<b>Total</b>	<b>\$925</b>

### Career Potential

On-line education is one of the fast-growing learning methodology. Many traditional learning institutions offer online courses as well as classroom. The knowledge of creating courses and instructing online is a marketable skill for all teachers.
