

## Career Link Programs:

**High school students in Career Link programs can complete a year of college while still in high school.**

- Benefits:**
- ◆ Save one year's time and one year's college tuition/book costs.
  - ◆ Receive college and high school credit for completed course work.
  - ◆ Ease transition to college.
  - ◆ Enhance self-esteem and self-confidence.
  - ◆ Develop career focus and achieve academic/personal goals.

The student usually begins the College Career Link program in his/her junior year taking only one or two NIACC courses. Several of the high school courses articulate into NIACC's programs if the student earns an "A" or "B" and meets the competency requirements. During the senior year, enrolled students spend about half of their school day taking NIACC career program classes with the remaining school day spent at the high school in required and articulated classes.

All tuition and textbook costs are paid through a combination of high school, NIACC, and state incentive funds. There is no cost to the student except for transportation, and in some programs, tools.
