

MESSAGE FROM CHIEF INFORMATION OFFICER

NIACC

With the increased use of video conferencing systems, such as Zoom, offering classes and trainings at NIACC, there have been concerns surrounding the security of using these online platforms. I want to assure our students, businesses and communities that we have taken additional precautions when using Zoom. NIACC employees using Zoom have the ability to closely monitor participants in Zoom meetings, while registration with an additional password is required to limit who can attend. These new security measures along with the training we have provided all NIACC staff will ensure all Zoom meetings are safe and protected.

Joshua C Mack
